SUMMARY

Results-driven Full-Stack Developer and Telecom Engineer with 3+ years of experience architecting high-performance web applications and managing mission-critical network infrastructure. Proven expertise in Next.js, React, and Node.js with demonstrated ability to optimize system performance, improve deployment speed by 15%, and consistently achieve 95+ Lighthouse scores. Track record of managing complex enterprise projects handling 100K+ monthly active users while maintaining 100% operational uptime.

EXPERIENCE

Mid-Level Product Technical Assistant | Huawei Pakistan | Islamabad | June 2026 – September 2026

- Managed 20+ live-network RFC tickets with 100% approval rate and coordinated 10+ daily integration tasks, ensuring zero operational disruption and maintaining enterprise SLA compliance.
- Oversaw technical readiness and acceptance workflows for 40+ microwave links, performing detailed parameter verification and validation to ensure successful deployment across all regional installations.
- Authored 100% of daily operational reports and Minutes of Meetings, maintaining clear documentation and seamless alignment across engineering, deployment, and management teams.

Full Stack Developer | RevIO | Islamabad | June 2023 – June 2025

- Architected and deployed full-stack SaaS platform handling 100K+ monthly active users with 99.9% uptime using React frontend, Node.js backend, and PostgreSQL database.
- Optimized frontend performance to achieve 90+ Lighthouse scores through code splitting, lazy loading, image optimization, and efficient React state management.
- Engineered comprehensive admin dashboard with real-time analytics, user management, operational insights, and role-based access control enabling data-driven business decisions.
- Implemented secure Stripe payment processing, real-time availability tracking, and automated confirmations processing 10K+ monthly transactions.
- Optimized PostgreSQL queries and database schema reducing data retrieval latency by 30% and improving application response time.

PROJECT

Personal Portfolio | hilalayaz.vercel.app

- Production-grade portfolio showcasing 95+ Lighthouse scores through custom asset optimization.
- Features include showcasing multiple projects including headless travel platform (PakTour), API-driven Weather app, and high-converting Tea House UI component library with responsive design.

PakTour – Headless Travel Platform | pak-tour-template.vercel.app

- Modern headless travel discovery platform for Pakistan tourism destinations.
- Implemented dynamic content management, interactive destination galleries, responsive design, and seamless booking integration.

SmashBox20 – Rage Room Booking Platform | smashbox20.com

- Full-stack booking platform processing 100+ concurrent bookings monthly.
- Built secure Stripe payment integration, real-time availability calendar, automated confirmations, and comprehensive admin dashboard for membership and operations management.

PenguViral – Web3 Marketing & NFT Platform | penguiviral.io

- Web3-enabled digital marketing platform managing 10K+ digital assets.
- Implemented NFT customization workflows, metadata handling, and campaign optimization resulting in improved conversion rates.

EDUCATION

Bachelor of Science in Computer Science | Sarhad University of Information Technology | Peshawar | 2023

- Data Structures, Algorithms, Database Management, Web Development, Software Engineering.

CERTIFICATIONS

MERN Stack Developer | 2023

META Front-end Developer Professional Certificate | 2023

Prompt Engineering for Generative AI | 2023

SKILLS

Frontend: React.js, Next.js 15+, TypeScript, JavaScript ES6+, HTML5, CSS3, Tailwind CSS, Material UI, Responsive Design, Lighthouse Optimization

Backend: Node.js, Express.js, Python, Django, FastAPI, REST APIs, Microservices

Databases: PostgreSQL, MongoDB, Firebase, SQL, Query Optimization

Cloud & DevOps: AWS, Azure, Vercel, Netlify, Docker, Git, CI/CD

Telecom: RFC Management, Network Architecture, Microwave Configuration, Live Network Deployment
